POLY PRO TOOLS

Poly Pro Tools is a privately held retail supply company that specializes in providing uniquely engineered polymer tools.

Headquartered in Zionsville, Indiana with distribution throughout North America, 100% of our products are manufactured in the United States and are currently available through many retail hardware stores, catalogs and e-commerce companies. Our product line consists of a variety of unique and durable shovels and hand scoops that are designed to succeed where other tools fail.

Our parent company, Remco Products has over thirty years' experience in the design, manufacture and distribution of professional polymer tools for the Industrial, Food and Pharmaceutical industries. Founder Richard Garrison built Remco Products

on two key principles — quality products and excellent customer service. The company was built on these principles and they are just as important to Poly Pro Tools today.

With a variety of professional-grade tools now available to the homeowner, farmer, gardener, horse enthusiast and more, scooping everything from snow to mulch becomes less of a burden. From our simple but effective hand scoop to our virtually indestructible line of shovels — our goal is to make life easier for whatever task.

For over 30 years, Remco Products has strived to bring new and innovative products to market. This philosophy has also been built into the DNA of Poly Pro Tools and is an invaluable trait to our customers.
